Cut along the grid lines to make flash cards. The capital letters represent the same sounds as the lower case letters. The learner needs to respond by automatically saying the sound each letter represents. At this stage, do not teach the letter names as these can cause confusion. Print this sheet twice to play 'pairs'. Place the cards face down. Turn over two cards to find a pair. Replace cards face down until a pair is matched then keep that pair. The pairs can either be a capital letter matched with a lower case or two of the same letters.
